GREEK SITUATION DESPERATE INVESTIGATE PEETE WITNESSES

ECONOMIC CONDITIONS BECOMING SERIOUS

(By Associated Press)
ATHENS, Greece, Feb. 11.—Economic conditions in Greece are becoming serious. Exportation of tobacco and other products are at a standstill, the army in Smyrna is costing 3,000,000 drachmas daily, and the treasury receipts are dwindling daily.

Food prices are rising and labor troubles appear to be threatening.

ENGINEERS MET LAST EVENING

A group of technical engineers of Tonopah met last evening at the Elks club and discussed the merits and demerits of senate bill No. 27, the purpose of which is to license and regulate all branches of the engineering profession in Nevada.

This bill was proposed by the Nevada chapter of the American Association of Engineers, a national association of technical men with headquarters in Chicago. This association aims to be the business organization of engineers and does not overlap in its functions the older technical societies. One of their main activities has been to raise the standards of the engineering profession by the passage of license laws in the various states.

It was brought out at this meeting that senate bill No. 27, while beneficial in its ultimate objects, was too loosely drawn to accomplish its purpose. A resolution pointing out the defects of the bill was hastily drafted and forwarded to Senator Fitzgerald, member of the committee on mines and mining, to whom the bill was referred.
